releasate) is being evaluated as an enhancement for soft-tissue healing by placing supraphysiologic concentrations ...

Medical Policy Autologous Platelet-Rich Plasma

Autologous platelet-rich plasma (PRP), also known as platelet gel and platelet concentrate, is prepared from a patient's centrifuged blood. Exposure to a solution of thrombin and calcium chloride degranulates platelets, releasing the various growth factors and results in the polymerization of fibrin from fibrinogen, creating a platelet gel.
